## Projects/Updates:

Re-Marking Project – TxDOT Aviation has finished the bidding phase, but we will likely be postponing the actual project until early spring, as painting during colder months will have a negative effect on the quality of work. I will keep everyone posted as soon as we have a schedule.

Gate/Badging Update – We have finished the hardware install for the gate controllers, and are currently working out bugs in the system. As of now, it looks as if we will start the training and badging process sometime early 2026. As I have said in the past, we are going to give ample time and will have numerous opportunities to schedule the training/badging before the codes are removed from the system. As always I will keep you informed when a schedule/start day is determined.
